Student Questionnaire

15-883 Spring 2005:
Computational Models of Neural Systems

David S. Touretzky

Contact Information:

Name:	Home phone:
Dept./University:	Work phone:
Year (junior, grad, postdoc, etc.):	Email address:

Registration (circle all that apply): **course** credit **core unit** credit **audit** (no credit)

Neuroscience Background:

Briefly describe your background in neuroscience, e.g., "no previous exposure", "have done reading on my own, such as ...", "have taken the following CNBC core courses," "am a doctoral student in neuroscience," etc.

Computational Background:

Briefly describe your computational background: (1) level of programming experience, (2) courses in AI, cognitive science, or neural networks you have taken. (3) Have you used Matlab before?

Research Interests:

What are you currently working on? Are there any aspects of computational neuroscience that are of particular interest to you, e.g., development of the visual system, neural basis of memory, etc.?
