

BBN Technologies
Abstract for

43rd Annual Collaborative Electronic Warfare Symposium
Enabling Collaborative EW through Innovation and Invention
April 8 - 10, 2014 | Pt. Mugu, CA

Title: Modeling RF Interference Performance.

Author: Dr. Karen Haigh

Abstract: BBN will address developments of computer based models that are able to evaluate the impact of interference on various communication waveforms. The models have shown the design sensitivity of the communication waveform protocols to the properties of the interfering waveform.
