A Selection Mechanism Based upon the Explicit Expression of Preference
N C Audsley, R E Baker  University of York, York, UK
- Decision Analysis techniques to support selection of system behaviour (supporting service provision) at runtime.

Resource based Approach to Feature Interaction in Adaptive Software
Jesus Bisbal, Universitat Pompeu Fabra, Spain,
Betty H.C. Cheng, Michigan State University, USA
- analysis of resource requirements of resources to determine conflicts.

Architecture Differencing for Self Management
Alexander Egyed, Teknowledge Corporation
- relationship between model and system w.r.t. change
