

Lunch and Learn

Free Student Dinner-n-Learn: Discover ANSYS Multiphysics Simulation

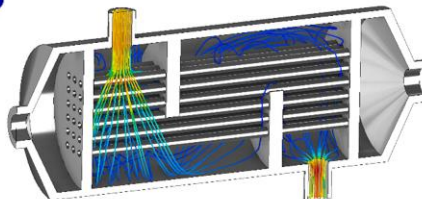

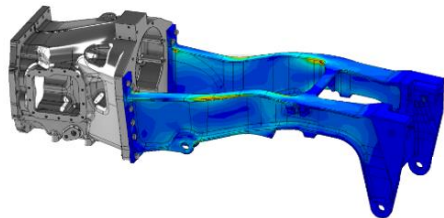

Learn how ANSYS simulation tools allow you to simulate fluid dynamics, structural dynamics and electromagnetics phenomena with great accuracy, and how they influence product design.

ANSYS is available @ Carnegie Mellon University

In this workshop, we will discuss:

- Why, as young engineers, simulation skills are key to boosting your career
- Free student resources to help with your projects (i.e., free on-demand MOOCs and tutorials)
- Inspiring simulation examples from students, student teams and innovative companies

We will showcase numerous simulation examples including topology optimization, additive manufacturing, antenna performance plus application examples from Ferrari, Dyson, Medtronic and more!

Date: October 17th, 2018

Dinner: 4:30 PM

Presentation: 5:00 PM

Venue:

Carnegie Mellon University
Gates-Hillman Center
Room 6115

Cost:

Free (space is limited)
