Northrop Grumman Future Technical Leaders (FTL) Program

At Northrop Grumman, we’ve developed the Future Technical Leaders (FTL) Program - a professional development opportunity aimed at identifying and investing in Northrop Grumman’s next generation of technologists, engineers, architects and leaders.

Our FTL Program is seeking talented MS and PhD 2016-2017 graduates interested in learning more about our exclusive three year rotational program working side-by-side with senior technical management. It’s the chance of a lifetime—one that only a few receive. To be eligible for the FTL Program, you must be at the top of your class in a Master’s or Doctoral program in the following majors. Due to the classified nature of the work, you must be a U.S. citizen and able to obtain a security clearance. Majors of interest include:

- Mathematics
- Physics
- Health IT
- Computer Science
- Operations Research
- Bio Informatics/Neuroscience
- Human Computer Interaction
- Information Technology: Information Security
- Software Engineering
- Electrical & Computer Engineering

We’re seeking leaders who aren’t afraid to push technology farther, dream bigger, and make the world safer than ever. Let’s do the work that matters—together.

Please come join us for conversation and lunch on Wednesday, April 27th between 12 - 1 in Gates and Hillman (GHC) Room 8115
