By Rui Zhang
Wednesday, September 28 @ 6pm
Rashid Auditorium – Gates & Hillman 4401
Swag & food will be provided!

Images are everywhere in Pinterest from Homefeed, Pin close-up to visual search. Videos might be new to Pinterest but they will definitely be woven into the future of Pinterest. What kind of system should we build to support the large scale of images and videos we’re hosting? Come learn about how we think about and build scalable systems to solve challenges related to images and videos.

Rui Zhang is a software engineer on the Media Platform team at Pinterest where he’s been building the video pipeline and is working on improving the image pipeline. Rui joined Pinterest after graduating from Carnegie Mellon University in 2014 with his master’s.
