Abstract: The talk will be about how we are building a software stack and a specialized processor that allows deep learning applications to run orders of magnitude faster than on traditional hardware.

Speaker Bio: Zhuo Chen received his PhD in Computer Science from CMU. His research area was in Mobile Computing, Distributed Systems, and the application of Computer Vision in such context. Zhuo is currently a Principal Software Engineer on our Machine Learning team.

Lunch will be served. First 5 attendees will receive wireless chargers.
