OurCS 2017
Opportunities for Undergraduate Research in Computer Science

What: 3 Day Workshop for Undergraduate Women in Computer Science
Where: School of Computer Science, Carnegie Mellon University
When: Oct. 20th, 21st, 22nd

Organized by Carnegie Mellon's School of Computer Science and Women@SCS

This 3 day workshop is research focused and will provide opportunities for undergraduate women from the USA and around the globe to work on exploratory problems in teams led by researchers from industry and academia.

Participants will be able to:

- explore the research experience in computing related domains
- work hands-on with researchers
- work in a team to tackle a research problem
- present a poster: great for first timers!
- meet others who share curiosity and interest in computer science
- learn about life in graduate school and the application process

2017 Speakers:
Alison Derbenwick Miller, Vice President Oracle Academy, Oracle
Nancy Amato, Regents Professor, Unocal Professor, Texas A & M University
Manuela Veloso, Herbert Simon Professor of Computer Science, Head, Machine Learning Department, Carnegie Mellon University

Thanks to our 2017 OurCS Sponsors: Oracle, Google, Amazon, Disney Research, CMU-Q, Duolingo, and SCS Depts.: CSD, ISR, ML, LTI, and RI
