

Quizlet 3

```
1 def mystery2(x):
2     total = 0
3     while x > 0:
4         print(x, total) # What will be printed in each iteration?
5         if x % 3 == 0:
6             return total
7         total = total + x
8         x = x - 1
9     return total
10
11 result = mystery2(5)
```

Given the code above, what values for `x` and `total` will be printed in each iteration? **You will not need all the table rows.**

Iteration number	Printed value of <code>x</code> (line 4)	Printed value of <code>total</code> (line 4)
1		
2		
3		
4		
5		
6		
7		
8		
9		
10		
11		
12
