

VA: Name _____ Andrew ID _____

Quizlet 4

Write a function `myFun` that takes a list of strings as a parameter and returns a string with **only** the words that have more than 4 characters, separated by "|". For example calling:

```
myFun(["cat", "elephant", "dog", "butterfly", "ant"])
```

returns

```
"elephant|butterfly|"
```

```
def myFun(lst):
```

```
    result = _____
```

```
    for _____:
```

```
        if _____:
```

```
            _____
```

```
    return result
```
