

15-410

“...misbehave(7)...”

Project 2
Feb. 2, 2005

Dave Eckhardt

Bruce Maggs

Synchronization

P2 (et seq.) partners

- “Partner Registration Page” on web site
- Almost all people have already registered - Thanks!
- If you know, *please register today*
 - This will help people still looking for partners

Good things to talk about

- How many late days?
- Project *schedule* in other classes
 - *Write down* a joint project schedule
- Auditing or pass/fail? Target 410 grade?
- Prior experience
- Interviews

Outline

What you'll build

- **Mutex, condition variable**
- **Thread library**
- **Supplemental library routines**
- **Tests**

How the pieces fit together

- **A picture is worth 1000 words**
- **You'll need to read the handouts too**
 - **(two, each >1000 words)**
 - **kspec – specifies our kernel for P2, your kernel for P3**
 - **thr_lib – specifies thread library**

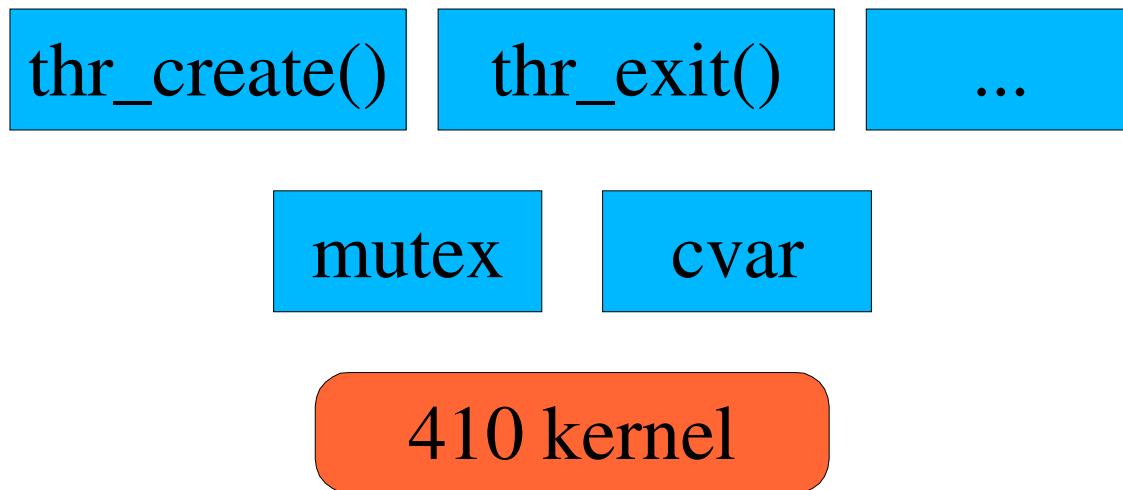

Mutex & Condition Variable

mutex

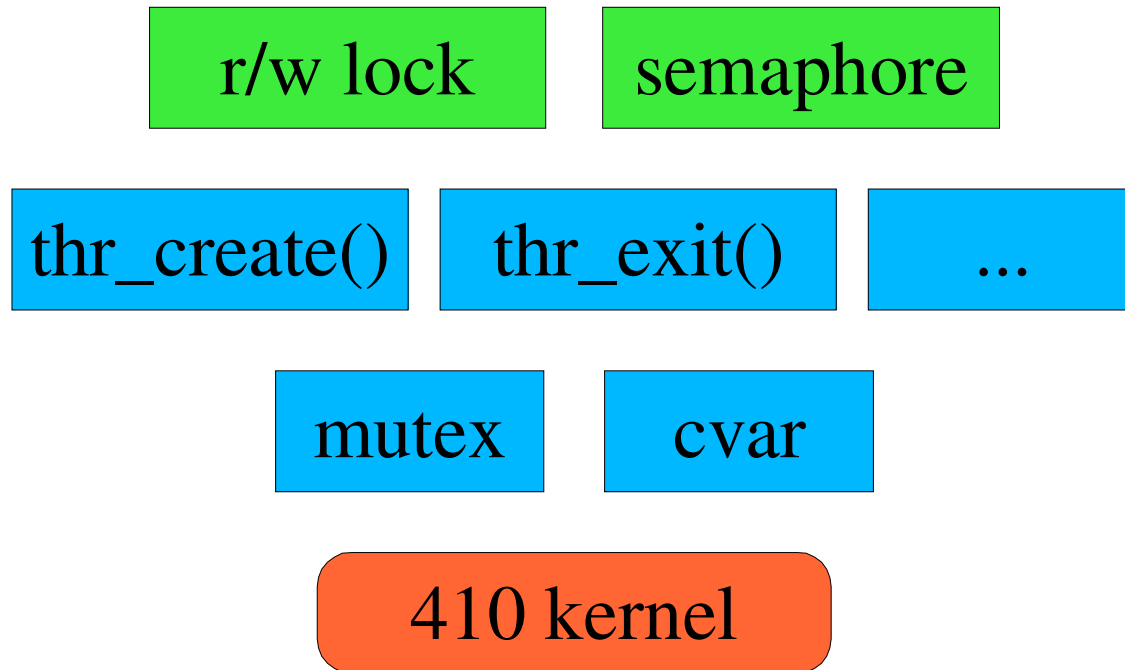

cvar

410 kernel

Remainder of Thread Library

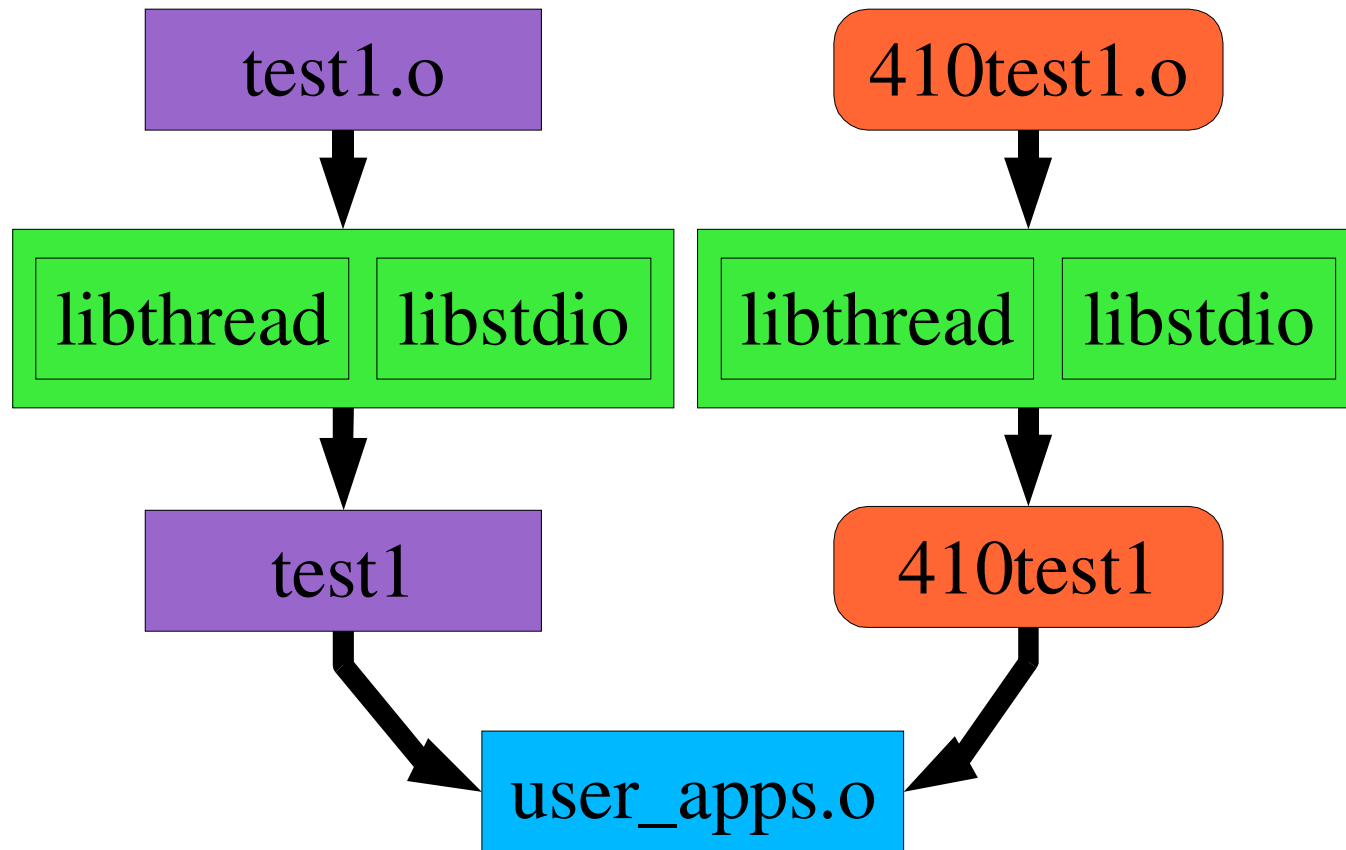

Supplemental Library Routines

Tests (Yours & Ours)

Building a “RAM disk” image

Linking “RAM disk” to kernel

Misbehave

misbehave(int mode)

- **Special debugging-support system call in our 410 kernel**
- **Adjusts “behavior” of system**
 - **Multiple legal behaviors (you will feel this during P3)**
 - **Each mode selects a particular mix**
 - **We will not document these**
 - **We expect you to not “document” them to classmates either**
- **Debug your thread library with one mode, then the next...**
 - **A dazzling array of flavors**
 - **0...15**
 - **maybe even more**
 - **-1**
- **You will not be required to implement misbehave() in P3**

Plea

This code is *tricky*

- Most of you have already written multi-threaded code
 - That can be tricky enough
- Writing the internals is harder
 - Get a part 99% done
 - Discover a “bug” ...
 - ...which is really a misconception...
 - *Totally new design* to fix it

Make sure core parts are solid

- Better to skip readers/writers locks if not

The first 90% will take the first 90% of the time

- The last 10% will take the *second 90% of the time*
