

EMBEDDING SALON

Salon is not a course management system, although it does contain many of the things course management systems should have. You can easily embed a Salon activity link in a course management system. All you need to do is to find the activity link from document manager.

If you'd like students to work on their own (participation mode) or see others comments and discuss (view mode) copy the links (like google docs) and email or place them in a Salon. The links are available from Document Manager
