17-355/17-655/17-819: Program Analysis
Recitation Exercises
March 22, 2019

Pair-programming with Z3 Exercise

You will pair-program with a partner for the rest of recitation. You will complete the challenge problem described in the CHALLENGE.md file found on the course website. You may write your solution in either Z3Py or SMT-LIB formats.

To get participation credit for this recitation, commit your code to your course GitHub repository under a **recitation8** folder. Since you will be pair-programming, to receive credit only one of you needs to commit the code so long as you indicate in a README.md file both of your Andrew IDs.
