

**15-826: Multimedia Databases
and Data Mining**

Lecture #15: Text - part II
C. Faloutsos

Must-read Material

- Textbook, Chapter 6

15-826 Copyright: C. Faloutsos (2011) 2

Optional (but terrific to read)

- ★ • McIlroy, M. D. (Jan. 1982). "Development of a Spelling List." IEEE Trans. on Communications COM-30(1): 91-99.
- ★ • Severance, D. G. and G. M. Lohman (Sept. 1976). "Differential Files: Their Application to the Maintenance of Large Databases." ACM TODS 1(3): 256-267.

CMU SCS

Outline

Goal: 'Find similar / interesting things'

- Intro to DB
- ➔ • Indexing - similarity search
- Data Mining

15-826 Copyright: C. Faloutsos (2011) 4

CMU SCS

Indexing - Detailed outline

- primary key indexing
- secondary key / multi-key indexing
- spatial access methods
- fractals
- ➔ • text
- multimedia
- ...

15-826 Copyright: C. Faloutsos (2011) 5

CMU SCS

Text - Detailed outline

- text
 - problem
 - full text scanning
 - ➔ - inversion
 - signature files
 - clustering
 - information filtering and LSI

15-826 Copyright: C. Faloutsos (2011) 6

CMU SCS

Text - Inversion

Dictionary Postings lists Text file

15-826 Copyright: C. Faloutsos (2011) 7

CMU SCS

Text - Inversion

Dictionary Postings lists Text file

Q: space overhead?

15-826 Copyright: C. Faloutsos (2011) 8

CMU SCS

Text - Inversion

Dictionary Postings lists Text file

A: mainly, the postings lists

15-826 Copyright: C. Faloutsos (2011) 9

CMU SCS

Text - Inversion

- how to organize dictionary?
- stemming – Y/N?
- insertions?

15-826 Copyright: C. Faloutsos (2011) 10

CMU SCS

Text - Inversion

- how to organize dictionary?
 - B-tree, hashing, TRIEs, PATRICIA trees, ...
- stemming – Y/N?
- insertions?

15-826 Copyright: C. Faloutsos (2011) 11

CMU SCS

Text - Inversion

- variations:
- Parallelism [Tomasic+,93]
- Insertions [Tomasic+94], [Brown+]
 - ‘zipf’ distributions
- Approximate searching (‘glimpse’ [Wu+])

15-826 Copyright: C. Faloutsos (2011) 12

CMU SCS

Text - Inversion

- postings list – more Zipf distr.: eg., rank-frequency plot of ‘Bible’

$$freq \approx \frac{1}{rank \ln(1.78V)}$$

15-826 Copyright: C. Faloutsos (2011) 13

CMU SCS

Text - Inversion

- postings lists
 - Cutting+Pedersen
 - (keep first 4 in B-tree leaves)
 - how to allocate space: [Faloutsos+92]
 - geometric progression
 - compression (Elias codes) [Zobel+] – down to 2% overhead!
 - Compression and doc reordering [Blandford+2002]

15-826 Copyright: C. Faloutsos (2011) 14

CMU SCS

Integer coding: small integers - > few bits

number	binary	Self-delimiting
2	10	00 1 10
3	11	00 1 11
15	1111	0000 1 1111

- $O(\log(i))$ bits for integer i
- can drop middle ‘1’
- can apply recursively, to length

15-826 Copyright: C. Faloutsos (2011) 15

CMU SCS

Document Reordering

Doc1 Doc2 Doc3 ...

Aaron	1	0	1	0	1	0 ...
ZOO	0	0	0	1	0	1 ...

15-826 Copyright: C. Faloutsos (2011) 16

CMU SCS

Document Reordering

Doc1 Doc3 ... Doc2

Aaron	1	1	1	0	0	0 ...
ZOO	0	0	0	1	1	0 ...

Shorter runs; easier to compress

15-826 Copyright: C. Faloutsos (2011) 17

CMU SCS

Conclusions

- Conclusions: needs space overhead (2%-300%), but it is the fastest

15-826 Copyright: C. Faloutsos (2011) 18

CMU SCS

Text - Detailed outline

- text
 - problem
 - full text scanning
 - inversion
 - ➔ – signature files
 - clustering
 - information filtering and LSI

15-826 Copyright: C. Faloutsos (2011) 19

CMU SCS

Signature files

- idea: ‘quick & dirty’ filter

Signature file	Text file
..JoSm..	... John Smith ...

15-826 Copyright: C. Faloutsos (2011) 20

CMU SCS

Signature files

- idea: ‘quick & dirty’ filter
- then, do seq. scan on sign. file and discard ‘false alarms’
- Adv.: easy insertions; faster than seq. scan
- Disadv.: $O(N)$ search (with small constant)
- Q: how to extract signatures?

15-826 Copyright: C. Faloutsos (2011) 21

CMU SCS

Signature files

- A: superimposed coding!! [Mooers49], ...

'YES' is 'MAYBE'
'NO' is 'NO'

15-826 Copyright: C. Faloutsos (2011) 26

CMU SCS

Signature files

- Q1: How to choose F and m ?
- Q2: Why is it called 'false drop'?
- Q3: other apps of signature files?

15-826 Copyright: C. Faloutsos (2011) 27

CMU SCS

Signature files

- Q1: How to choose F and m ?

Word	Signature
data	001 000 110 010
base	000 010 101 001
doc.signature	001 010 111 011

m (=4 bits/word)
 F (=12 bits sign. size)

15-826 Copyright: C. Faloutsos (2011) 28

CMU SCS

Signature files

- Q1: How to choose F and m ?
- A: so that doc. signature is 50% full

Word	Signature
data	001 000 110 010
base	000 010 101 001
doc.signature	001 010 111 011

m (=4 bits/word)
 F (=12 bits sign. size)

15-826 Copyright: C. Faloutsos (2011) 29

CMU SCS

Signature files

- Q1: How to choose F and m ?
- ➔ Q2: Why is it called ‘false drop’?
- Q3: other apps of signature files?

15-826 Copyright: C. Faloutsos (2011) 30

CMU SCS

Signature files

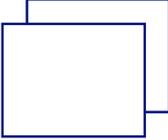

- Q2: Why is it called ‘false drop’?
- Old, but fascinating story [1949]
 - how to find qualifying books (by title word, and/or author, and/or keyword)
 - in $O(1)$ time?
 - **without computers** (1949...)

15-826 Copyright: C. Faloutsos (2011) 31

CMU SCS

Signature files

- ‘State of the art’: cards – but $> O(1)$

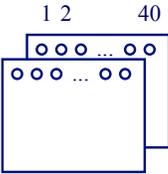

- one copy alpha by author
- one by title
- ...

15-826 Copyright: C. Faloutsos (2011) 32

CMU SCS

Signature files

- Solution: edge-notched cards

- each title word is mapped to m numbers (how?)
- and the corresponding holes are cut out:

15-826 Copyright: C. Faloutsos (2011) 33

CMU SCS

Signature files

- Solution: edge-notched cards

1 2 40

‘data’ -> #1, #39

15-826 Copyright: C. Faloutsos (2011) 34

CMU SCS

Signature files

- Search, e.g., for ‘data’: activate needle #1, #39, and shake the stack of cards!

1 2 40

‘data’ -> #1, #39

15-826 Copyright: C. Faloutsos (2011) 35

CMU SCS

Signature files

- Also known as ‘zatocoding’, from ‘Zator’ company.

15-826 Copyright: C. Faloutsos (2011) 36

CMU SCS

Signature files

- Q1: How to choose F and m ?
- Q2: Why is it called ‘false drop’?
- ➔ • Q3: other apps of signature files?

15-826 Copyright: C. Faloutsos (2011) 37

CMU SCS

Signature files

- Q3: other apps of signature files?
- A: anything that has to do with ‘membership testing’: does ‘*data*’ belong to the set of words of the document?

Word	Signature
data	001 000 110 010
base	000 010 101 001
doc.signature	001 010 111 011

15-826 Copyright: C. Faloutsos (2011) 38

CMU SCS

Signature files

- UNIX’s early ‘spell’ system [McIlroy]
- Bloom-joins in System R* [Mackert+] and ‘active disks’ [Riedel99]
- differential files [Severance + Lohman]

Doug
McIlroy

Eric
Riedel

Guy Lohman

15-826 Copyright: C. Faloutsos (2011) 39

CMU SCS

App#1: Unix's spell

Dictionary

~30,000
words

aaron
apple
...
zoo

← ?
electroencephalogram

What to do if the dictionary does not fit in memory (~1980)?

15-826 Copyright: C. Faloutsos (2011) 40

CMU SCS

App#1: Unix's spell

A: allow for a few typos! And use

- huge bit string (2^{27})
- Hash each dictionary word to a bit
- Compress the string

aaron
apple
...
zoo

2^{27} bits

Copyright: C. Faloutsos (2011) 41

CMU SCS

App#1: Unix's spell

Sub-questions:

- Q1: How often do we allow typos?
- Q2: Will the (compressed) bit string fit in memory?
- Q3: How to compress the bit string?

15-826 Copyright: C. Faloutsos (2011) 42

CMU SCS

App#2: Bloom-joins

R @Chicago

A	B	C
1		
1		
3		
...		
1		
12		

S @NY

A	E	F
1		
18		
1		
...		
23		
2		

R join S (@PIT)

15-826 Copyright: C. Faloutsos (2011) 43

CMU SCS

App#2: Bloom-joins

R @Chicago

A	B	C
1		
1		
3		
...		
1		
12		

S @NY

A	E	F
1		
18		
1		
...		
23		
2		

Idea: reduce transmission cost: 'R semijoin S'

44

CMU SCS

App#2: Bloom-joins

Idea: reduce transmission cost: 'R semijoin S'

That is,

- 'S' ships its unique values of 'A'
- 'R' deletes non-matching tuples
- (and they both send their tuples to PIT)

Q: what if we want to send at most, say 100 bytes NY -> Chicago?

15-826 Copyright: C. Faloutsos (2011) 45

CMU SCS

App#2: Bloom-joins

Q: what if we want to send at most, say 100 bytes NY -> Chicago?

A: Bloom-join! Send a bloom filter of the S.A values

15-826 Copyright: C. Faloutsos (2011) 46

CMU SCS

App#3: Differential files

Problem definition:

- A large file (eg., with EMPLOYEE records), nicely packed and organized (eg., B-tree)
- A few insertions/deletions, that we would like to keep separate, and merge, at night
- How to search, eg., for employee #123?

15-826 Copyright: C. Faloutsos (2011) 47

CMU SCS

App#3: Differential files

ssn	name	...
1		
5		
12		
...		
503		
509		

flag	ssn	name, ..
i	123	
i	55	
d	17	
d	33	

Differential file

15-826 Copyright: C. Faloutsos (2011) 48

CMU SCS

App#3: Differential files

- Q: How to search, eg., for employee #123?
- A: bloom-filter, for keys of diff. file

- Q: What are the advantages of differential files?
- A: <see paper, for 10(!) of them>

15-826 Copyright: C. Faloutsos (2011) 49

CMU SCS

Signature files - conclusions

- easy insertions; slower than inversion
- brilliant idea of ‘quick and dirty’ filter: quickly discard the vast majority of non_qualifying elements, and focus on the rest.

15-826 Copyright: C. Faloutsos (2011) 50
