

New features & improvements

CP6 catom

CP7 catom

CP7 IRDA

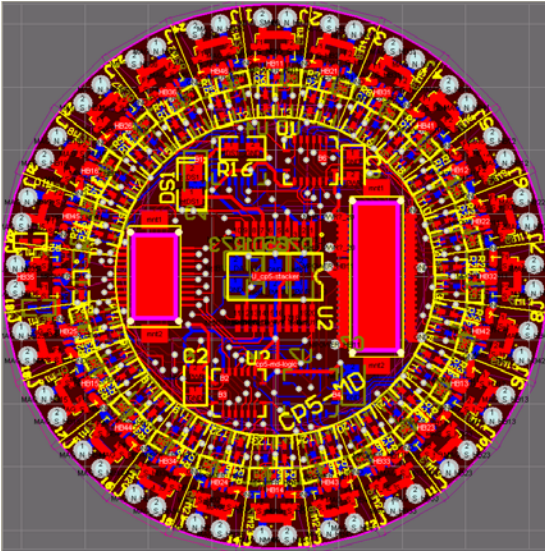

Improvements:

- New, more compact magnets
- New, better assembly

Features:

- Local Communications
- Relative localization

Magnet Control

CP-5 (7/05)

Pros

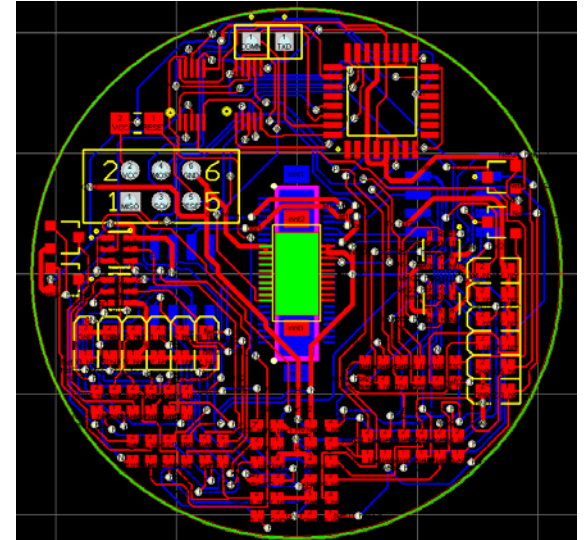

Simple design

Managed very dense packing

Cons

Supply noise killed mosfets

Binary control only

CP-7 (8/06, ongoing)

Pros

Protection from overvoltage

PWM current graduation

Cons

Better circuit means more parts

Current board drives 3 magnets
