Medical Imaging Modalities

Methods In Medical Image Analysis—Spring 2014
BioE 2630 (Pitt) : 16-725 (CMU RI)
18-791 (CMU ECE) : 42-735 (CMU BME)

Dr. John Galeotti

Anatomical Axes

- Superior = head
- Inferior = feet

- Anterior = front
- Posterior = back

- Proximal = central
- Distal = peripheral
Imaging Modalities

- Camera: Microscope, Endoscope, etc.
- X-Ray
- CT
- Nuclear Medicine
- Ultrasound
- MRI
- ...

1896: The X-Ray
X-Ray & Fluoroscopic Images

- Projection of X-Ray silhouette onto a detector
- Measures densities
- 3D maps to 2D
- Detectors often use an intervening fluorescent screen to convert X-rays to visible light
- Fat, muscle, bone, contrast agent, metal

Computerized Tomography

- Spin X-Ray source/detector around the patient
- From a series of projections, a tomographic image is reconstructed using Filtered Back Projection.
Nuclear Medicine

- Previously discussed imaging modalities image anatomy (structure).
- Nuclear medicine images physiology (function)
  - At the cellular (and subcellular) level
  - Technically a type of molecular imaging
  - Requires use of radioactive pharmaceuticals

SPECT

- Single Photon Emission Computed Tomography
- Gamma camera for creating image of radioactive target
- Camera is rotated around patient
Positron Emission Tomography

- Positron-emitting organic compounds create pairs of high energy photons that are detected synchronously.
- No collimators, greater sensitivity.
- Attenuation is not location dependent, so quantification is possible.

Phased Array Ultrasound

- Images anatomy
- Ultrasound beam formed and steered by controlling the delay between the elements of the transducer array
Real Time 3D Ultrasound

Other Imaging Modalities

- MRI & fMRI (will review later)
- OCT (“optical ultrasound”)
- Pathology (in addition to Radiology)
- Other modalities coming down the pike
Current Trends in Imaging

- 3D, 4D, ...
- Higher speed
- Greater resolution
- Measure function as well as structure
- Combining modalities (including direct vision)

The Gold Standard

- Dissection:
  - Medical School, Day 1: Meet the Cadaver.
  - From Vesalius to the Visible Human
