

Keepon (Michalowski) Questions

Homework: look for a youtube video on Keepon before you answer the below questions.
Any Keepon video you find (there are several).

1. Is this form of periodicity and motion an important part of HRI? Why or why not?
2. Experimental design. Consider and design an experiment *not* identical to what Marek describes in this paper. Specifically, consider an experiment to see if adults and childrens' interactions and assumptions differ with Keepon. Describe your experiment and, most important, what you will measure and what that will tell you.
