RESEARCH INTERNSHIPS

Facebook AI Research, New York (2017)

Advisor: **Rob Fergus, Laurens van der Maaten, Ross Girshick**

Worked on actively acquiring supervision for learning algorithms. Proposed a learning setting for Visual Question Answering where the agent acquires supervision by asking questions, rather than learn from a fixed dataset alone.

Microsoft Research, Redmond (2015)

Advisor: **Ross Girshick, Larry Zitnick, Meg Mitchell**

Primarily worked on learning from large scale web data using noisy labels and developed a system that can learn to label like a machine or a human by just using noisy human labels. Also contributed on projects involving language generation and visual storytelling.

Microsoft Research, Redmond (2014)

Advisor: **Xian-Sheng Hua**

Worked on Large scale weakly supervised image classification. Designed meaningful and scalable patch-based image features which used weakly supervised data. Improved the classification performance over base Convolutional Neural Network based system.

INRIA/Ecole Centrale Paris, France (2012)

Advisor: **Professor Iasonas Kokkinos**

My work focused on using shading cues (based on classical techniques like Shape From Shading, Photometric Stereo) and using them on images from an object category taken in general unknown illumination.

Yale University, USA (2011)

Advisor: **Bryan Ford**

Worked on the **Determinator Operating System** to detect physical memory on systems, boot loaders for USB booting, porting from x86 to x64.
