				Timer First					URLConnection First					Timer First					URLConnection First				
				1	5	9	13	17	2	6	10	14	18	3	7	11	15	19	4	8	12	16	20
Timer	T	T-1	How do I transition a Timer Task from the Virgin state to the Scheduled state?	49	32	40	57	70	22	11	34	40	16	32	134	69	107	128	100	99	132	35	102
	N	T-2	What is the effect of calling the purge method on the behavior of the Timer?	50	52	69	63	52	53	53	56	69	93	48	42	76	58	81	92	64	71	41	99
	C	T-3	What methods can I call on a Scheduled TimerTask?	14	38	28	48	9	46	34	43	18	21	44	37	175	45	152	109	89	118	25	129
	N	T-4	What is the difference between schedule(TimerTask task, long delay, long period) and scheduleAtFixedRate(TimerTask task, long delay, long period)?	58	64	95	78	46	59	54	67	80	120	84	57	95	57	89	63	80	83	45	112
	O	T-5	What state does a TimerTask need to be in to call scheduledExecutionTime?	43	77	37	56	56	22	37	17	42	54	43	41	50	50	94	48	62	76	46	82
	C	T-6	Can I schedule a TimerTask that has already been scheduled?	40	79	78	29	39	33	29	34	65	61	82	18	63	70	15	50	99	235	27	199
ResultSet	N	R-1	How is a ResultSet instance created?	60	70	113	88	76	92	93	99	179	168	76	69	127	74	119	109	96	119	60	140
	C	R-2	Can I call the getArray method when the cursor is on the insert row?	24	60	80	27	27	43	13	10	79	109	43	20	113	78	83	104	19	90	9	136
	O	R-3	What state does the ResultSet need to be in to call the wasNull method?	60	25	19	37	19	25	24	26	14	31	39	53	113	19	75	90	31	193	95	28
	T2	R-4	How do I transition a ResultSet object from the ForwardOnly to the Scrollable State?	67	600	600	76	600	600	23	600	600	600	52	77	144	217	13	143	600	57	113	600
	O	R-5	Which states does the ResultSet need to be in to call the updateInt method?	25	52	27	43	8	38	25	45	69	74	16	105	62	61	110	75	155	68	95	95
	A	R-6	What state is the ResultSet object if a call to the next method returns false?	43	41	53	62	9	29	22	36	77	41	60	109	81	119	61	62	144	41	27	93
	T	R-7	How do I transition a ResultSet object from the CurrentRow to the InsertRow state?	57	29	59	11	41	47	53	37	36	29	162	47	87	77	22	179	63	386	45	198
	N	R-8	Why does getMetadata take no arguments and getArray take a int columnIndex or String columnName as an argument?	32	45	57	54	34	46	50	36	46	83	56	35	71	57	57	62	56	65	40	85
	C	R-9	Can I call the isLast method on a forward only ResultSet?	38	84	89	100	60	46	36	20	67	85	46	165	137	103	176	207	163	128	37	458
	A	R-10	What states could the ResultSet object be in when a call to the next method throws a java.sql.SQLException because it is in the ResultSet is in the wrong state?	14	43	46	16	27	58	22	26	70	46	83	41	101	77	57	76	22	43	14	29
URLConnection	A	U-1	What state is the URLConnection in after successfully calling the getContent method?	43	19	6	39	11	42	60	50	139	62	66	39	42	125	67	136	18	301	88	150
	C	U-2	If the URLConnection is in the connected state can I call the setDoInput method?	39	65	23	25	17	32	50	18	41	113	144	105	49	51	54	115	132	143	23	92
	N	U-3	How do I create a URLConnection instance?	51	58	76	67	39	57	41	47	107	67	54	37	67	55	61	36	54	65	33	99
	O	U-4	What state does the URLConnection need to be in to call the getInputStream method?	22	57	53	20	37	44	50	13	93	13	21	45	86	55	76	62	26	182	11	92
	T	U-5	What method can I transition an URLConnection from the Connected to the Disconnected state?	20	56	24	23	38	20	46	33	25	62	99	22	108	172	31	267	25	53	76	190

Category key

- N Non-state questions
- A What abstract state is an object in?
- O In what state(s) can I do operation Z?
- C What are the capabilities of an object in state X?
- T How do I transition from state X to state Y?
- T2 Transition with many timeouts

Answer coloring key

- Correct answers, black on white
- Timeouts, brown on yellow
- Incorrect answers, red on pink
