

This is the HTML source we developed in the beginning of Lecture 2:

```
<html>
  <head>
    <title>this is an example</title>
  </head>
  <body>
    <h1>hello</h1> there
    <h2>hello again</h2>
    <p>This is where lots of text will go</p>
    <p>Education is not about the filling of a bucket but the lighting of a fire!"
      <br/>- William Butler Yeats </p>

    <table border="5">
      <tr><td>a</td><td>b</td></tr>
      <tr><td>c</td><td>d</td></tr>
    </table>
    
    

    <ul>
      <li>this is the first item</li>
      <li>second item</li>
      <ol>
        <li>this is a sublist</li>
        <li>hi</li>
      </ol>
      <li>back to the first list</li>
    </ul>

    <strong>January 9<sup>th</sup></strong>

    <hr/>

    <div>
      This is a <em>division</em>
    </div>

    <form>
      <input type="button" value="button text"/>
      <input type="text" value="stuff"/>
    </form>

    <!-- this is a comment -->

    <a href="http://www.google.com">Google is cool!</a>

  </body>
</html>
```

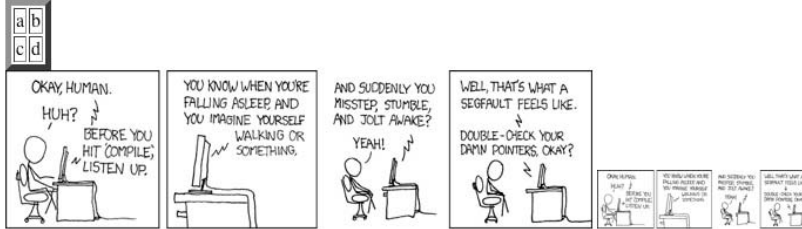

# hello

there

## hello again

This is where lots of text will go

Education is not about the filling of a bucket but the lighting of a fire!"  
- William Butler Yeats

- this is the first item
- second item
  1. this is a sublist
  2. hi
- back to the first list

### January 9<sup>th</sup>

This is a *division*

button text stuff

[Google is cool!](#)

Here is the source for the CSS file we started in class and will finish in class on Monday:

```
<html>
<head>
  <style type="text/css">
    <!--
      p {
        background: blue;
        color: yellow;
        border: 5px solid green;
      }
      body {
        background: #660000;
      }
    -->
  </style>
</head>

<body>
<p style="color: white; background-color:black">
  hello there
</p>

<p>
  Hello again
</p>

</body>
</html>
```
