

## Homework Assignment 8

Due via Canvas, **Friday** April 7th by midnight

SDS 321 Intro to Probability and Statistics

- (2+2+3+1) Suppose that the height, in inches, of a 25-year-old man is a normal random variable with parameters  $\mu = 71$  and  $\sigma^2 = 6.25$ .
  - What percentage of 25- year-old men are over 6 feet, 2 inches tall?
  - What percentage of men in the 6-footer club are over 6 feet, 5 inches?
  - What is the probability that more than half of the group of 5 25-year old men are over 6 feet, 2 inches tall?
  - For the last question, what assumptions are you making?
- (2+2) The time (in hours) required to repair a machine is an exponentially distributed random variable with parameter  $\lambda = 1/2$ . What is
  - the probability that a repair time exceeds 2 hours?
  - the conditional probability that a repair takes at least 10 hours, given that its duration exceeds 9 hours?
- (1+1+3+1+2 pts) The joint probability density function of X and Y is given by Let  $X$  be a random variable with PDF

$$f_{X,Y}(x,y) = \begin{cases} \frac{6}{7} \left(x^2 + \frac{xy}{2}\right) & 0 < x < 1, 0 < y < 2 \\ 0 & \text{Otherwise} \end{cases}$$

- Verify this is a joint density function?
- Compute  $f_X(x)$ .
- Compute  $P(X > Y)$ .
- Compute  $P(Y > X)$ .
- What is the CDF (Cumulative Distribution Function) of  $X$ ?
