Win eBay Auctions with eSnipe!

eSnipe gives you the power to effectively manage and win eBay auctions by placing bids for you during the last few seconds of an auction - a practice commonly know as "sniping." With eSnipe bidding for you, you can mask your interest in an item, protect your privacy, change or cancel bids, and more. Here's how it works:

- **eSnipe bids automatically for you on eBay.**
  You place bids on eSnipe when it's convenient for you. Then, during the last seconds of the auction, eSnipe bids automatically for you.
- **eSnipe masks your interest in auction items.**
  On eBay, emotional overbidding can push prices sky high. eSnipe can reduce these bidding wars by masking interest in an item until the last possible moment.
- **eSnipe protects your privacy.**
  Your interest in an auction item may trigger interest in like-minded bidders. But with eSnipe, no one will know you're bidding on an item until the auction is over.
- **eSnipe lets you easily change or cancel bids.**
  At any time during an auction (up until 5 minutes before the auction closes), eSnipe lets you cancel a bid or change the amount of your bid.
- **eSnipe is fast, reliable, and accurate.**
  eSnipe's powerful Rovatron engine runs on high-speed dedicated servers with 24/7 support. We place more than 10,000 bids a day totaling $16 million a month.
- **eSnipe delivers world-class customer service.**
  At eSnipe, we care about our users, and our team will do everything we can to give you the best possible bidding experience.
- **eSnipe is inexpensive.**
  eSnipe charges only if you win an auction, using a simple fee structure that averages about 1% of the winning bid - even less for larger wins.
