Larch (Formal specification languages and tools)
Learning Lab (artificial intelligence)
LCR98 Workshop
Logical Frameworks (LF and Elf)
Lunar Rover Initiative
Lycos

MacGnome
Mach operating system group
Manipulation lab (robotic manipulation)
MAPS (remote sensing, cartographic feature extraction and simulation)
Metaphor Project (study of real-time software evolution)
Midway (SW-based distributed shared memory)
Microdynamic Systems Laboratory
Miro (visual specification of security) (FTP directory)
Model Checking
Monarch (adaptive mobile and wireless networking protocols)

Navlab project (autonomous vehicles and navigation)
Nectar (high-speed networking and distributed computing)
NetBill (electronic commerce)
Neural net speech group
Nitpick (automatic analysis of NP specifications)

Coda and Odyssey (mobile information access)
Onika (an iconic programming environment for reconfigurable software)
Oz Project (interactive entertainment)

Pangloss (multi-engine machine translation)
Parallel Computer Vision
Parallel Data Lab (Filesystems and I/O)
Parallel Systems Group
Prodigy (AI planning and learning system)
PVM (Parallel Virtual Machine)

Quake (earthquake ground motion modeling)

Real Time Mach
Reinforcement Learning Group
Robosoccer
