Members of the Mobot Committee will be on hand to introduce the **22nd Annual Mobot Races** and to answer any questions regarding the races, course, prizes and rules.

ALL potential participants and those just considering an entry in the the races are welcome. Individuals and team efforts are particularly encouraged. If you can’t build a Mobot yourself, lean on colleagues, friends, or associates in other divisions. There is strength (and often better Mobots!) through collaboration and sharing of skills and knowledge. Open to the CMU community and alums!

Our great sponsors include:
Lockheed Martin, Boeing, Harris, Google, School of Computer Science
