Description

The Americas School on Agents and Multiagent Systems is a yearly event aimed at orienting new graduate students in the field of Agents and Multiagent Systems. The school is particularly focused on educating graduate students in North and South America, although undergraduates, non-student attendees, and students from all over the world are welcome to apply.

The School will consist of an intensive four days of tutorials intended to cover a broad spectrum of topics in the field. The first two days, which take place directly before AAAI 2005, will consist of invited lectures given by internationally recognized leaders in the field. These lectures are meant to give students a broad overview of the most important topics in the field of Agents and Multiagent Systems. For the second two days, students will attend selected tutorials from the AAAI 2005 Tutorials Program relevant to Agents and Multiagent Systems. Note that the cost of the AAAI 2005 Tutorial Program and Technical Conference registration are included in the registration for the School.

Registration

In order to pre-register, please email your name, affiliation and current position (PhD student, Masters Student, Undergraduate, Industry, or specify other) to Jay Modi (pmodi@cs.cmu.edu). Further registration details will follow. The deadline for application is May 10 2005.

Cost: The registration fee for the Agents School will be USD$250, which will include all Agents School sessions, the AAAI-05 technical registration (~ $185 value) and Tutorial Forum. You must be a student in order to register at this rate. Rates for other applicants are also available. There will also be limited financial aid available from the School.

Program Chairs

Pragnesh Jay Modi, Carnegie Mellon University
Paul Scerri, Carnegie Mellon University

Advisory Committee

Barbara Grosz, Harvard University
Randall W. Hill, Jr., University of Southern California
Sven Koenig, University of Southern California
Michael van Lent, University of Southern California
Victor Lesser, University of Massachusetts
Simon Parsons, Brooklyn College, City University of New York
Katia Sycara, Carnegie Mellon University
Milind Tambe, University of Southern California
Manuela Veloso, Carnegie Mellon University

Sponsors

We gratefully acknowledge the generous sponsorship of the School by the following:

International Foundation for Multiagent Systems (IFMAS)
American Association for Artificial Intelligence (AAAI)
The Robotics Institute (CMU/RI)
