Words and Lexicalization

October 9, 2014

Seminar on Endangered Languages
How to do things with words
(but not as Austin intended)

• What is a word?
• They have a word for it
• They don’t have a word for it
  – Chinese in-out-door
• They have n words for it
• Languages with very few verbs (have, be, do) or very few nouns (grass)
• Lexicalization (figure, manner, ground)
  – Conflation vs serialization (manner of motion, resultative secondary predication)
• What it’s like to be an Eskimo: operationalization, happinesslessnessless
What is a word?

• From Crystal, Cambridge Encyclopedia of Language (Page 91)
  – Potential pause: people usually don’t pause in the middle of a word.
  – Indivisibility: except for expletive insertion “fan-freakin-tastic” words are usually not inserted in the middle of words.
  – Minimal free forms (from Bloomfield):
    • But some words never stand on their own: e.g., “the” and “of”
  – Phonetic boundaries: some phonetic processes happen within words:
    • Stress the nth or nth to last syllable
    • Vowel harmony
Words and orthography

• Some languages use spaces between words.
  – But with some arbitrariness or strange sub-regularities:
    • I have a baseball, basketball, football, golf ball.
    • Spanish clitics: él me lo dio, dámelos
      – Note that the clitics don’t cause the stress to move to the penultimate syllable.
    • Sotho uses spaces where other Bantu languages don’t:
      – Faass et al. (2009)
Other types of sub-sentential units

- Japanese bunsetsu (example from Wikipedia)
  - A phonological phrase in which “the pitch can have at most one fall” (Wikipedia).
  - But Japanese also has a word for “word” (tango).

太陽が東の空に昇る。
*taiyō ga* | *higashi no* | *sora ni* | *noboru*
sun SUBJECT | east POSSESSIVE | sky LOCATIVE | rise
The sun rises in the eastern sky.
Words and Culture

- They have a word for it:
  - [http://www.slate.com/blogs/lexicon_valley/2013/12/27/finnish_the_language_has_a_word_for_the_distance_that_a_reindeer_can_travel.html](http://www.slate.com/blogs/lexicon_valley/2013/12/27/finnish_the_language_has_a_word_for_the_distance_that_a_reindeer_can_travel.html)

- What is the significance or non-significance of this?

Reindeer can't walk too far without answering the call of nature. In fact, they are unable to walk and pee at the same time, so they have to take a bathroom break roughly every 6 miles. In Finnish, this distance is known as "poronkusema" or "reindeer's piss" and was an old-fashioned description of distances in the countryside.
Words and Culture

• They don’t have a word for X:
• You can follow this on Language Log:
  – No word for “rape” in Urdu
  – No word for “sorry” in Tagalog
  – No word for “please” in Icelandic
  – No word for “looting” in Japanese
  – No word for dyslexia in languages with good spelling
• What is the significance or non-significance of this?
Words and Culture

• They have N words for it:
• You can follow this on Language Log too:
  – Words for “snow”, etc.
• What is the significance or non-significance of this?
Polinsky, *Headedness, again*

Polinsky

HI=head initial
Udi: A language with few verbs

- http://wschulze.userweb.mwn.de/sampletxt.htm

- sa pasc^’ag/-en sa pasc^’ag/-ax c^’ax-p-i
  - one king-erg one king-dat2 catch-lv:trans-aor
  - A king [having] caught a king (and)

- yesir-re-aq’-sa e-ne-sc^a ic^ ölki-n-a ic^ k’ua e-ne-f-sa
  - IMPRISONes (him), CARRIEs (him) to his own land, KEEPs (him) in his own house.

- s^e-t’-a pasc^’ag/lug/-ax-al zaft-t’e-b-sa.
  - dist-sa:obl-gen kingdom-dat2-foc rule-3sg:a-lv-pres
  - He RULEs over that kingdom, too.
Udi: A language with few verbs

• [http://wschulze.userweb.mwn.de/sampletxt.htm](http://wschulze.userweb.mwn.de/sampletxt.htm)

• `pasc^’ag/-en xabar-re-aq’-sa me-t’-uxo te`
• `king-erg news-3sg:a-take-pres prox-sa:obl-abl quote`
• The king ASK-s this one:
A language with very few nouns

- I heard a talk about it once, but I don’t remember what it was.
- A lot of plants were kinds of grass.
- Maybe the language was in Kansas.
- Or the person who gave the talk was from Kansas.
- Maybe the language is extinct. I remember something about all the speakers being old and then there was a flu epidemic. And then there were even fewer speakers (around 4). And that was 20 years ago.
Lexicalization of motion events

• Leonard Talmy (1985) Lexicalization Patterns: Semantic Structure in Lexical Form
  – Figure
  – Ground
  – Manner
  – Path
  – Cause

• The bottle went floating on the river into the cave.
• figure move manner ground path
Talmy (1985) Lexicalization

- The bottle went into the cave.
  - “went” expresses move
- The bottle entered the cave.
  - “enter” expresses Move + path
- Deplane, debark, detrain
  - Move+ground (rare)
- The paper blew off the table
  - “blow” expresses move+cause
- The bottle floated into the cave
  - “float” expresses move+manner
  - Many languages do not easily lexicalize move+manner
  - Vs. The bottle went into the cave floating
• **Give** me the flour + **move** it down from the shelf + **reach** it with your free hand ➔

• Could you **reach** me the flour down off the shelf with your free hand.
Many languages cannot lexicalize these meanings

- **Example 13A:** Conflation of motion with something other than a manner of motion:
  - Wear+go: wear a dress to the party.
  - Read+go: read comics all the way to NY
  - Induce+go: lure/scare someone out of a hiding place
  - Aim to induce to go: urge/wave/beckon him away from the building
    - “wave” includes a manner too.
• Change of state (become) plus manner:
  – Choke to death
  – Flap dry in the wind
  – Rust stiff
  – Wear thin
  – Freeze stuck
• Many languages do not lexicalize this easily
  – Die choking; become stiff by rusting
• Come into existence (form) + manner
  – a hole burned in the table
Put Project

• Stable URL
  – http://fieldmanuals.mpi.nl/volumes/2004/put-project/
Putting and Taking
Kopecka and Narasimhan (2012)

• The figure:
  – Rigid or flexible
  – Body part of the agent or not
  – Granular vs liquid vs solid
  – Clothing item
  – Big vs small
  – Shape (e.g., long, round)

• The ground
  – Animate vs inanimate
  – Body part of agent or not
  – Horizontal vs vertical
  – Floor or higher
  – Container vs supporting surface

• Spatial relation
  – Containment vs support
  – Tightly or loosely fitted
  – Figure is vertical or horizontal wrt ground
  – Figure suspended from a point

• Instrument
  – Agent’s hand, mouth, vs other instrument

• Manner
  – Dropping, throwing, placing, pouring
  – Agent maintains control until figure reaches destination or not
  – Agent moves with the figure or just moves his/her hand
Motion+ground+path (page 77)

- Shelve books (onto shelves)
- Box the apples (into boxes)
- Quarry granite (from the quarry)
- Mine bauxite (from the mine)
<table>
