1 Questions

1. How are things going for Paul?
2. I'm having trouble finding relevant literature on machine learning under noise. How important is it to include these citations in our paper?
3. Do we want to cover the mapping to "my governor" and "my dependent" in this paper?
4. I know people aren't familiar with this approach, but am using about 6 out of 8 pages in the SSST paper just to describe our approach with an extended example. Is that odd?
5. To distinguish between the LREC and the ACL papers, I am using the terms *inductive* vs *deductive* feature detection. Is this reasonable vocabulary?
6. Do I need to start making any arrangements for LREC?

2 Recently Accomplished

1. Added ability to view feature structures to the Elicitation Tool
2. Started adding WALS features to LREC experiment. Going slowly, but 2 per day should get it done.
3. Wrote code to take Paul's data and evaluate my output
4. Created (very) rough draft of ACL/SSST paper: "Inductive Detection of Language Features: Toward Feature-Rich Grammars in Structured Translation"

3 Upcoming Dates

1. Feb 29 (FRI) - LREC SALTMIL Paper Submission
2. March 13 (THU) - LREC Early Bird Registration
3. March 14 (FRI) - ACL Short Paper Submission
4. March 17 (MON) - ACL SSST-2 Paper Submission
5. March 24 (MON) - LREC Camera-Ready
6. March 30 (SUN) - COLING Paper Submission
7. *April 7 - SSST-2 Notification*
8. *April 14 - ACL Short Paper Notification*
9. *April 21 - Both ACL Papers Camera-Ready*
10. April 28 - CoNLL Paper Submission
11. *May 30 - COLING Notification*
