Join **Bloomberg Engineering** for a Tech Talk: **Building Intelligent AI Agents for Game Worlds**

Date: Thursday, November 19th, 2020

Time: 6:00pm to 7:00pm ET

Location: <https://meet.google.com/fko-fhax-zhg>

Registration required via link below

How do you create an intelligent player for a virtual world? Artificial intelligence offers a variety of ways to program intelligence into computer opponents. In this tech talk, we'll show how it works, using intelligent heuristics with the minimax algorithm, training an agent with logical-based AI, supervised and unsupervised machine learning, genetic algorithms, and reinforcement learning. We'll review two web-based games that you can try yourself - Isolation and Wumpus World.

If you are interested in attending, please register here:
