Intel Tech Talk for Graduate Students

Date:
Thursday September 16th

Time:
11:30AM-2:00PM

Location:
Gates Hillman Room 6115

Lunch will be provided

Drawing for an Atom powered
Netbook- Must be present to win!

Bring Your Resume

We are inventors, each and every day.

From 11:30AM-12:30PM: CMU Alumni, Corry Weber, manager in the Design and Technology Solutions department at Intel Corporation will discuss how DTS uses computer simulations to enable development of Intel's logic and memory technologies. *This talk will be of interest to MS and PhD students in Electrical & Computer Engineering, Computer Science, Chemical Engineering, Mechanical Engineering, Material Science, and Physics*

From 12:30PM-1:00PM: Lunch will be served and a drawing will be held for an Atom powered Netbook

From 1:00PM-2:00PM: Mike Voss, Intel expert in parallel computing and adaptive program optimization, will provide an overview of Software development at Intel and a detailed look at his work developing Intel® Parallel Building Blocks: Language Extensions and Libraries for Parallelism *This talk will be of interest to MS and PhD students in: Electrical & Computer Engineering, and Computer Science.*
