

There's Another Choice

Cyber Security Careers Vital to National Security

Cyber security is the #1 threat to the nation's security. Do you want to make a difference in the world? Hungry for work that is more than just interesting, and really matters to national security?

We are the Cyber Security Division of MIT Lincoln Laboratory. We conduct fundamental research to solve some of the most challenging cyber problems facing the nation today. We're looking for the best and brightest to join our elite team.

Everyone here plays a crucial part in discovering new solutions to critical problems. At MIT Lincoln Laboratory we are motivated to innovate, to take risks, and to give you an opportunity to protect the nation and to change the world.

We make the world better by making it harder for the bad guys to create havoc in cyberspace. Do you like breaking software, hacking embedded systems, reverse engineering,

tinkering with cryptography, applying machine learning, or competing with a world class Capture the Flag team? Whatever your technical passion is, you'll be a great fit here!

We're located in Lexington, MA, where the air is clean and bike trails come close to our door. We pay well and offer amazing benefits. Due to the nature of our work, U.S. citizenship is required for all of our openings.

Scan the QR code, or visit this link <http://bit.ly/2xeByE7> to learn more about our current openings. We look forward to talking with you!
