

TECH TALK

AI and Deep Learning in the Real World

Artificial intelligence (AI) and deep learning are everywhere now, in applications such as autonomous driving, predictive maintenance, and robotics. Join us for a look at these technologies and learn about industry trends. This tech talk features:

Insights on AI and
deep learning

A discussion of
real-world
applications

Interactive
tutorials

Details
about career
opportunities

Date: Tuesday, January 28

Time: 6 p.m.

Location: Posner Hall A35

Pizza will be served.

**MATLAB®
& SIMULINK®**

MathWorks, based in Natick, Massachusetts, develops MATLAB and Simulink—software that transforms the way engineers and scientists think and work. Come learn about the exciting things we do with AI and deep learning and how you can get involved through internships and full-time positions. We look forward to meeting you.
