

Recruiting for the future of Healthcare!

The Medical Imaging Technology team of Siemens Healthcare Technology Center has openings in Princeton, NJ, for Research Engineers, Staff Scientists, and Senior Experts, with a focus on Deep Learning. Our Princeton facility is recognized for providing a stimulating environment for highly talented and self-motivated researchers. You will have the opportunity to test your knowledge in a challenging problem-solving environment. You will be encouraged to think out-of-the-box, innovate and find solutions to real-life problems. Our team has a strong publication record in leading journals and conferences. We are located ten minutes from the Princeton University campus.

What are my responsibilities?

- Research, design, and implement algorithms for Deep Learning
- Advance the state-of-the-art, including generating patents and top publications
- Work on large-scale, real-world problems

What do I need to qualify for this job?

- Strong expertise in Deep Learning libraries (Caffe, Theano, Torch, etc.)
- Strong programming skills in C++

If interested, please send your resume to
