

Siemens FutureMakers Challenge @CMU

Event: April 13-14, 2018 - 4:00 pm – 4:00 pm

Information session: April 12 - 4:30 pm

Location: ASA Conference Room, Gates Hillman 6115

Calling innovative minds with a passion for solving, building, and creating software-related projects!

Siemens FutureMakers Challenge: Making Innovation to Society Real is a 24-hour Challenge with a 2-hour presentation/judging period following the event. Computer programmers, graphic designers, interface designers, project managers, and other tech-savvy individuals involved in software development will collaborate intensively on software projects. And, all first, second, and third place team members will receive prizes!

At **Carnegie Mellon University**, Challenge participants will be working on projects related to the following theme: **Design, Verification and Manufacturing using AI**. This theme includes all aspects of AI to empower designs that are better than crafted by humans and to build intelligent products and production systems that are more reliable than engineered by humans. Teams of 2-5 students (must include at least 1 PhD student) from the university will build and demonstrate their project immediately following the event.

Team projects will be judged based on the following criteria:

Technology (25%), theme (45%), business (20%), presentation (5%), and populous vote (5%).

Don't miss out! [Register here today:](#)
