

Hi, **CMU**. We're Hudson River Trading. You know, **automated** trading, the kind that uses **machine learning** and **smart algorithms** to improve market efficiency. HRT is a **tech company** and our people are **physicists and statisticians, engineers and mathematicians**. We're **CMU**, Harvard, MIT, Cornell, Stanford, and more. At HRT, responsibility is **distributed** according to individual impact, so becoming a **systems** engineer means you'll work on challenging **computer science** problems. Become an **algo developer** and you might find yourself looking at **massive** amounts of **market data** and using a variety of tools to come up with **complex** strategies. If you are a **hacker** who wants to work in a **powerful computing environment**, we want programmers who can reduce latency and increase throughput, in a place where every second counts. And don't be fooled – **we're not a typical finance company**; our coders are the most important investment we have – and they know it. It's no secret that your **compensation will be high** and rewards are **merit-based**. We are proud to be a math and technology company with a culture that mirrors any you'd find in Silicon Valley: we are code-writing, **ping-pong**-playing, challenge-seeking problem solvers. Join the fun and become a **coder at HRT.<3**

P.S. – **we HRT new york city<3**

WE'RE HIRING!

Full-time Software Engineers, Algorithm Developers

WE'RE COMING TO CAMPUS!

Let's Talk | **September 18**

Technical Opportunities Conferences | **September 19**

Meet HRTers over coffee and donuts | **September 20, 5th Floor Lobby - Gates**

On Campus Interviews | **September 21**

Apply on HRT's website or at the Technical Opportunities Conference
