Servers

Google.com

IP Address

Facebook.com

IP Address

A computer that runs services..
What kind of services?

- mail server
- application server
- Netflix server

IP4 Addresses

QUIZ: How many different IP4 addresses can we have? 2^{32} if 32-bit

Components of an IP address

- Each device that is connected to a network has an IP address

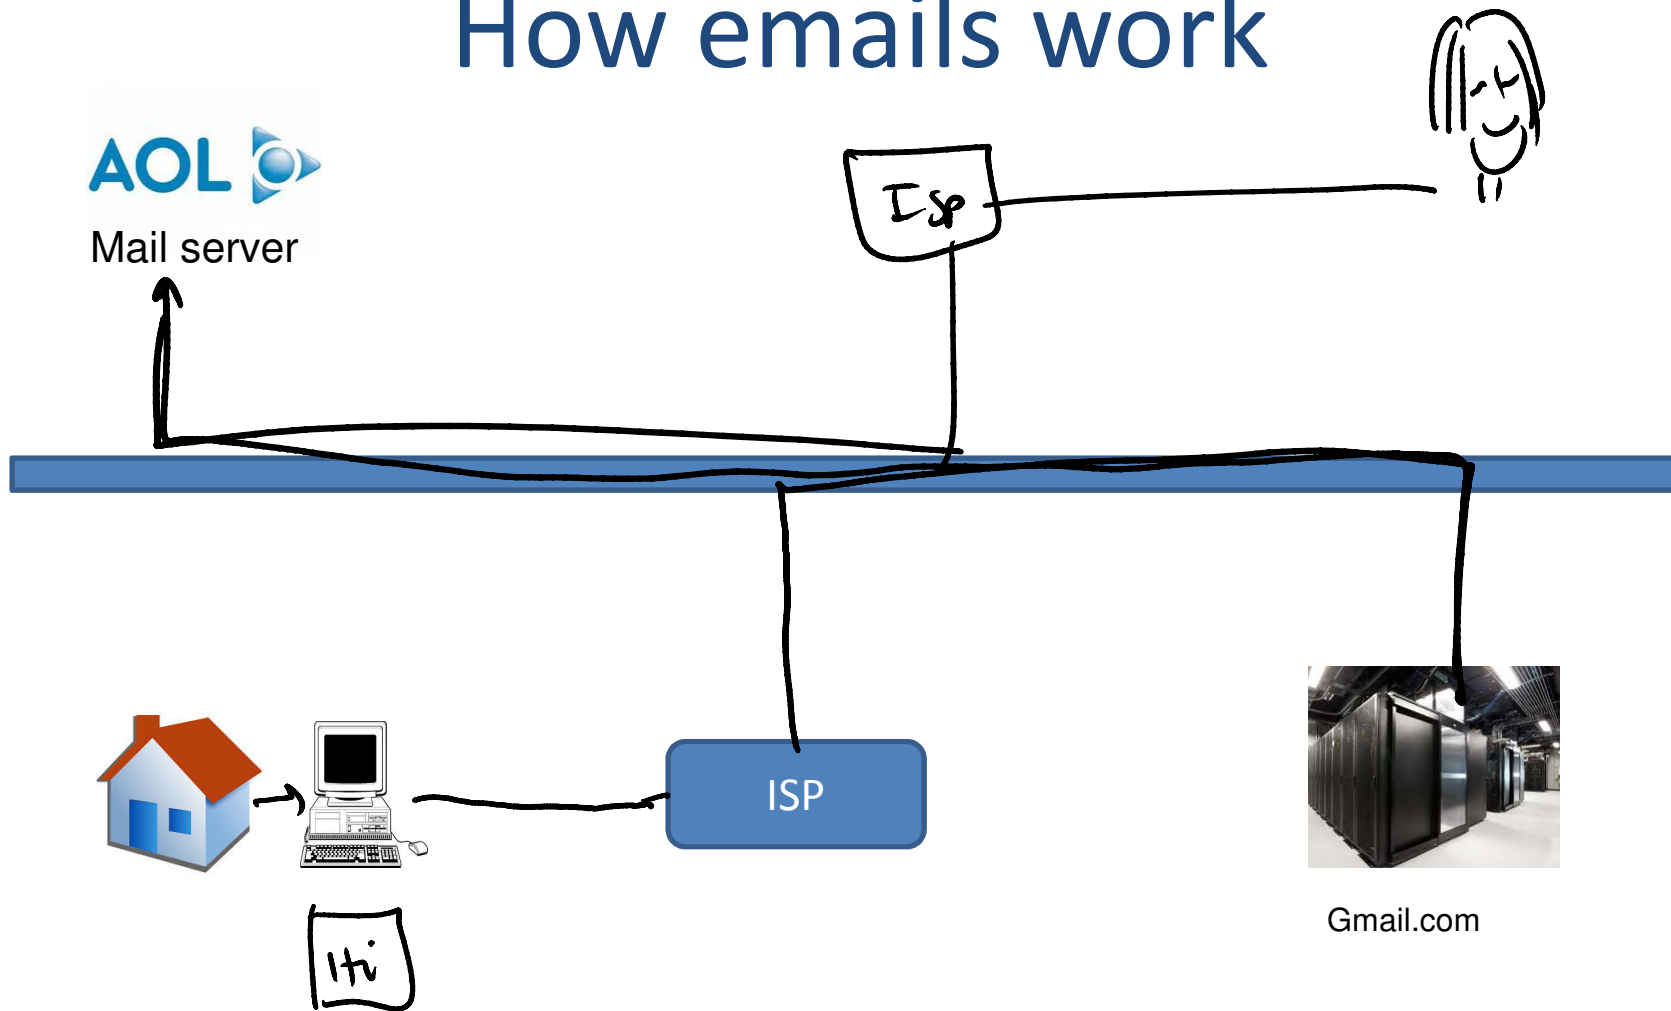

- 192.168.66.5 *global IP*

- 127.0.0.1 *local IP*

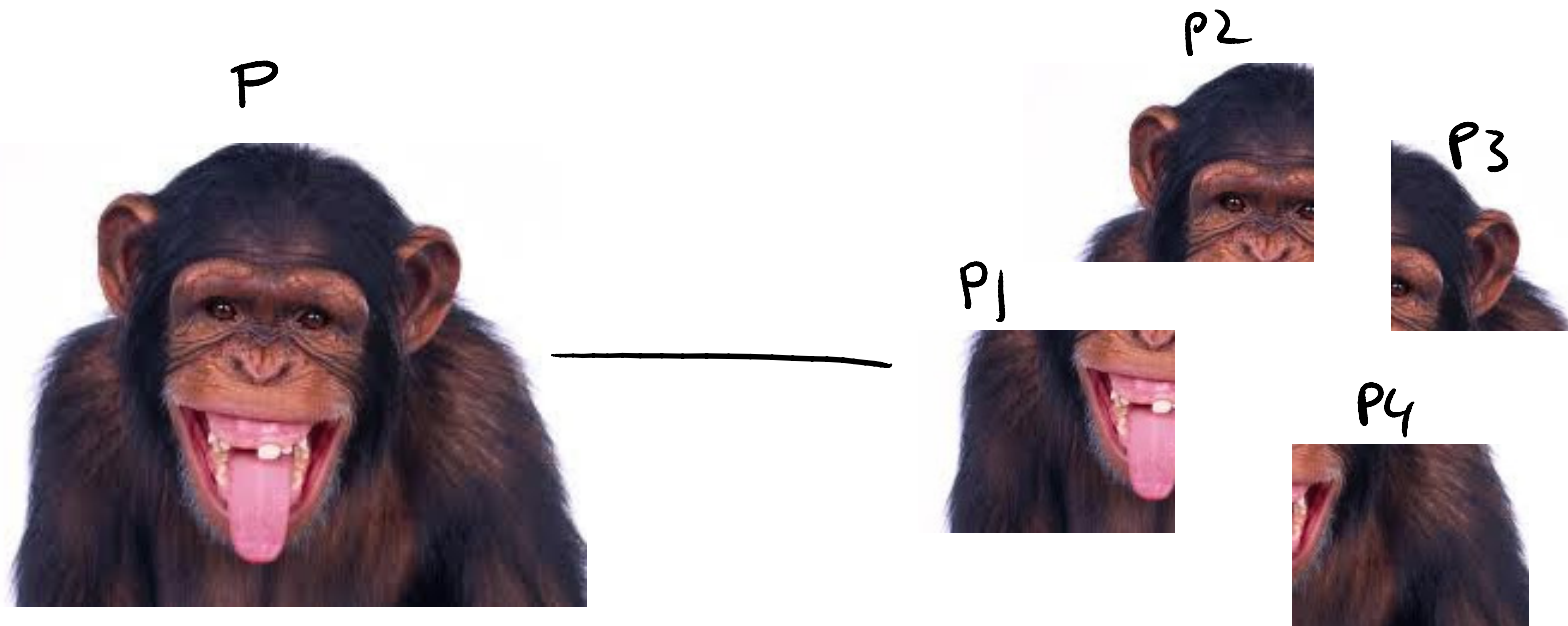

Your home network

How emails work

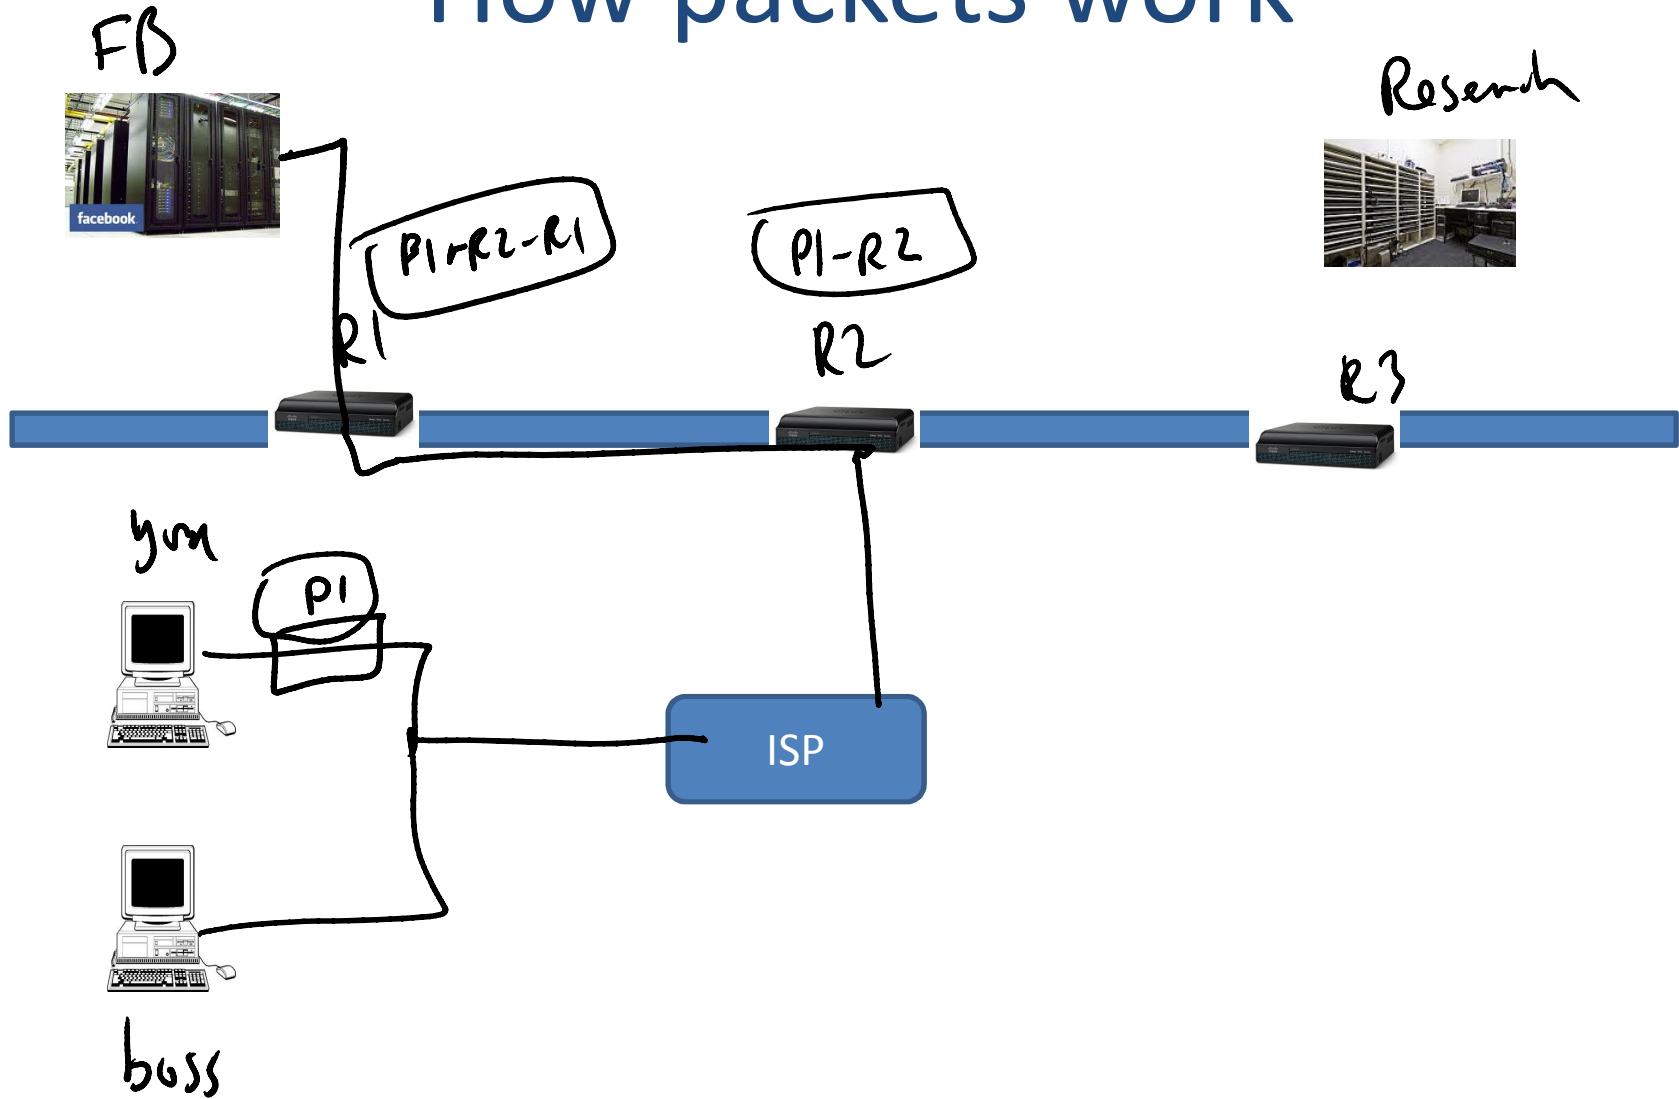

How data is sent

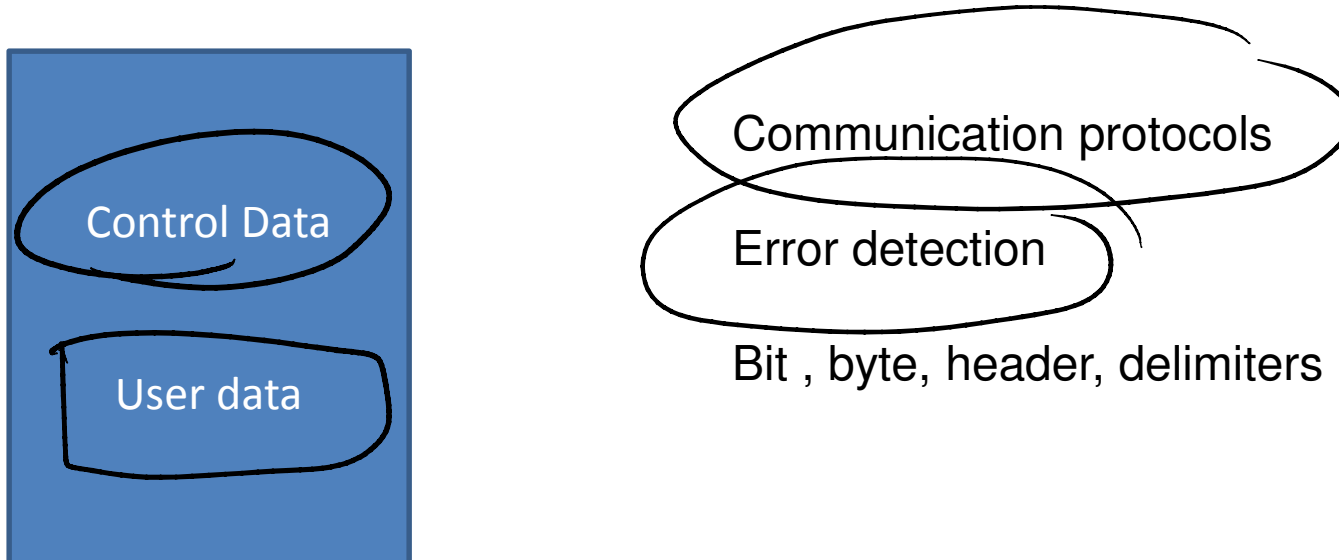

Formatted, encoded

Packets

How packets work

Packet Framing

Communication

Communication Protocols

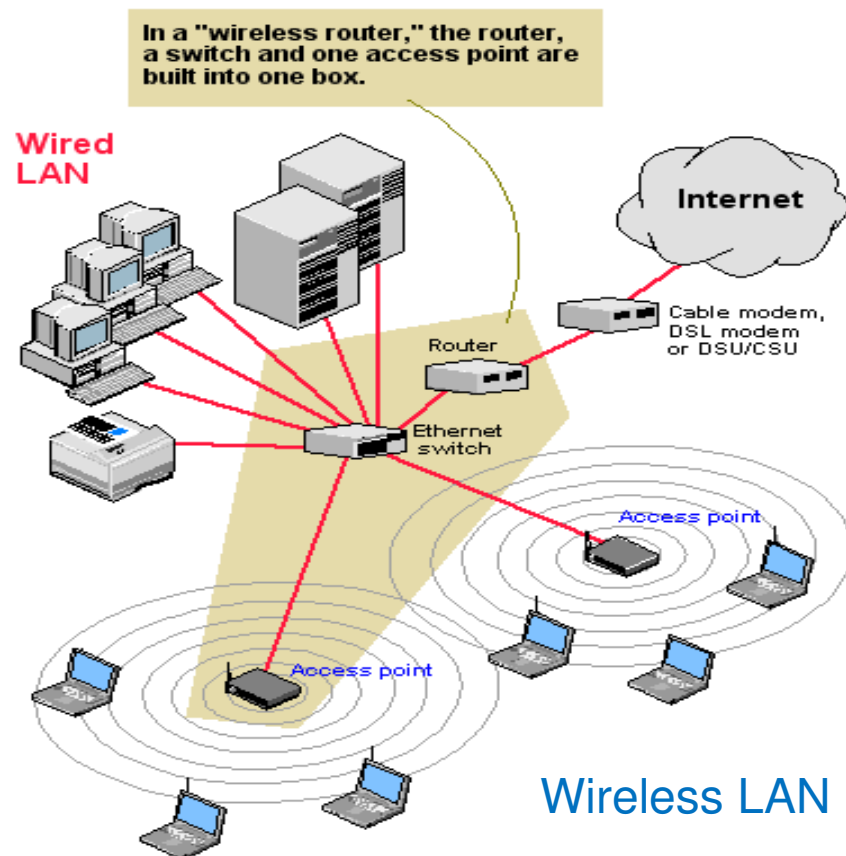

- Digital message formats and rules for exchanging those messages
 - signaling, authentication, error detection and correction capabilities.
- Protocols have to be agreed upon by the parties involved. To reach agreement a protocol may be developed into a technical standard.
- Standards Bodies
 - International Standards Organization (ISO), Internet Society, W3C

Wireless Data Communication

- Wireless data communication using radio, microwave, and infrared signals
 - Wireless local access network: user transmits messages to a local wireless base station referred to as a wireless router. Typically used in homes, coffee shops.
 - Wireless wide area access network: user transmits messages to a remote base station provided by a telecommunications company.

Examples

From Computer Desktop Encyclopedia
© 2007 The Computer Language Co., Inc.

Wireless WAN

Wireless Local Access Standards

- Wi-Fi (Wireless Fidelity). Officially IEEE 802.11 wireless network standards.
 - Wireless version of a wired local area network

- Bluetooth

- Low-power wireless standard for communication between devices close to each other

www

world wide web

The **World Wide Web** (abbreviated as **WWW** or **W3**,^[2] commonly known as **the Web**), is a system of interlinked hypertext documents accessed via the Internet. With a web browser, one can view web pages that may contain text, images, videos, and other multimedia, and navigate between them via hyperlinks.
