

Default Value

When the A button is pressed, glow red.
Otherwise glow blue.

situation → DO **action1** **value**
otherwise → DO **action1** **default-value**

Default Value

When the A button is pressed, glow red; otherwise glow blue.

General Form:

WHEN *situation* DO **action1** **value**

WHEN DO **action1** **default-value**

The default case must come *after* the specific case. The action must be the same in both rules; only the value is different. For different actions, use the If-Then-Else idiom.
